

Contents

1	Introduction	1
1.1	The Role of Games	1
1.2	Problem Statement	4
2	Game Theory—The Player’s Paradigm	9
2.1	A Brief Connecting History of Game Theory and Recreational Game Studies	10
2.1.1	Some Game Theory Games	12
2.1.2	Experimentation Early in Game Theory	16
2.1.3	Preferences, Utility Curves, Trees	18
3	Game Refinement Theory—The Maker’s Paradigm	23
3.1	Related Works	24
3.1.1	Early Works, and the Model of Chess	25
3.2	The Model	27
3.3	Continuous Movement Games	30
3.3.1	Considerations on the Model: Three Approaches	31
3.3.2	Board Game Approach	32
3.3.3	Round-Match Approach	32
3.3.4	Time Limited Approach	33
3.3.5	A Note on the Non-Interchangeability of Approaches	33
3.4	Hockey	35
3.5	Golf	38
3.6	Tennis	40
3.7	Other Score Limited Games	44
3.8	Results	45
3.9	Game Information Dynamics	48

4	Towards Verification with BAMING	53
4.1	Brain Imaging	54
4.2	Functional Brain Measurements of Gamers During Gaming (BAMING)	57
4.3	Survey of BAMING Experiments	57
4.4	BAMING and Game Refinement Theory	66
5	Conclusions and Future Work	69
	Appendix A Experimental Design	75
